

How To Use Authenticator

Authenticator is Loop8's built-in TOTP (Time-Based One-Time Password) authenticator, designed to generate secure, rotating codes for logging into websites and apps that require two-factor authentication (2FA). This guide walks you through how to set it up and use it to strengthen your online security with every sign-in.

Open the Loop8 App

- Launch Loop8 on your mobile device and unlock with Face ID or fingerprint.

Tap Authenticator

- On the home screen, tap the **Authenticator** icon to open your authenticator dashboard.

Add an Authenticator

- Tap the **+** (plus) button or click 'Add a code'
- Use your phone's camera to scan the QR code provided by the website or app you're setting up.

Get Your Code

- Once added, your one-time password (OTP) will appear and refresh automatically every few seconds. Use this code to complete sign-in wherever 2FA is required.

Authenticator is ready to go!

Your rotating codes make every login faster, safer, and fully passwordless. Loop8 keeps your apps and accounts secure, so you can focus on what really matters.

If you have any questions or need a hand, our team is always here to help.

Enjoy your safer, simpler digital life with Loop8!
