

Setting Up a Security Pin

Your account is already highly secure with Loop8's Face ID or fingerprint protection, but for extra peace of mind, you can also add a Security PIN. Follow this guide, and you'll have extra confidence knowing your sensitive data is fully protected.

Step 1: Access Security Settings

- 1.1 From the home screen in Loop8, tap the **'Me'** icon in the bottom navigation bar.
- 1.2 On the settings page, scroll down to the **'App Settings'** section.
- 1.3 Tap on **'Security PIN Code.'**

Step 2: Set Your PIN Code

- 2.1 Tap **'Set a PIN Code.'**
- 2.2 Enter your chosen **five-digit code.**
- 2.3 Re-enter the code to confirm.

Note: Loop8 uses a five-digit format to discourage reuse of your phone's native PIN.

Step 3: Use Your PIN Code

- 3.1 Once enabled, you'll enter your PIN each time you unlock Loop8.
- 3.2 Authentication will require both your biometrics and PIN for extra security.

Step 4: Manage Your PIN Code

- 4.1 At any time, return to the same settings menu to update or change your PIN Code.
- 4.2 You can also disable the PIN Code entirely if you no longer wish to use this feature.

It's that simple!

Setting a Security PIN adds an extra layer of protection to your Loop8 account, helping keep your data safe and fully private.

If you have any questions or need a hand, our team is always here to help.

Enjoy your safer, simpler digital life with Loop8!
