

Generate a Strong Password with Loop8

Loop8's built-in password generator makes staying secure effortless. In just seconds, you can create strong, unique passwords —no repeats, no guesswork. Each password is automatically saved and synced across your devices, so you never have to memorize or type another password again.

Using your Mobile Device:

Step 1: Open the Loop8 App

→ Launch the Loop8 mobile app and unlock it with Face ID or fingerprint.

Step 2: Go to a Create Account or Recover Account Screen

→ When you're signing up for a new site or resetting a password, tap into the password field.

Step 3: Tap Generate Password

→ Select Generate Password when prompted.

Step 4: Password Fills Automatically

→ Loop8 will insert a strong, unique password into the password field and save it to your vault for future autofill.

Using your Desktop / Browser Extension

Step 1: Open the Website Where You're Creating or Resetting an Account

→ Go to the sign-up or password reset page.

Step 2: Click the Password Field

→ When the Loop8 browser extension icon appears, click it or look for the 'generate password' option.

Step 3: Insert and Save

→ Loop8 automatically generates a strong, secure password for you, saves it safely, and fills it in the next time you log in—so you can stay protected without lifting a finger.

It's that simple!

You're now all set to generate strong, secure passwords that are automatically stored within Loop8, giving you effortless, worry-free logins and keeping your accounts fully protected—no weak passwords, no worries, just complete security.

If you have any questions or need a hand, our team is always here to help.

Enjoy your safer, simpler digital life with Loop8!
